"The impact of limited internet access on student learning"

Reflection Question: What did I learn from my experience selecting a topic and using my chatbot?

1. I learned how I can use the chatbots to help me find good topics for my research, and I learned how chatbots can help me find relevant and authoritative resources using prompts.
2. I found that prompting has a big impact on the results that the chatbot gives. By optimizing the prompts based on the results that the chatbot gives us, we can get the most optimal results.
3. When I think about chatbots, I feel that we can achieve great ideas by using them, and this tool can have a great impact on our whole life.

Reflection Question: What did I learn from my experience talking to my partner about my topic?

1. My partner was Ally. She's research topic was how Tiktok impacts one`s mental wellbeing and how the usage of the app is linked to rising anxiety and depression and she was in support it.
2. She agreed with the opinions and results of my research and was in the same position with me.
3. When I think about her subject, I remember that I was in the same position with her.

Provide an interesting insight you developed during each of your assignments that may be useful to other students.

- **In these few weeks and the activities we had in class, I realized that throughout our lives we are always composing and rhetoric in different situations without knowing it. This class helps us to acquire and improve the skills of understanding the situation and persuading people who are in the opposite position. We also learn how to use tools like chatbots to help us achieve our goals.**

Partner reflection

Nate`s topic : Native american issues

- **It was hard to find the topic I cared about.**
- **I struggled with how to word information into Claude.(Prompting)**
